Total Admissions	218
Average Tenure for Clients Admitted	233 Days

Demographics

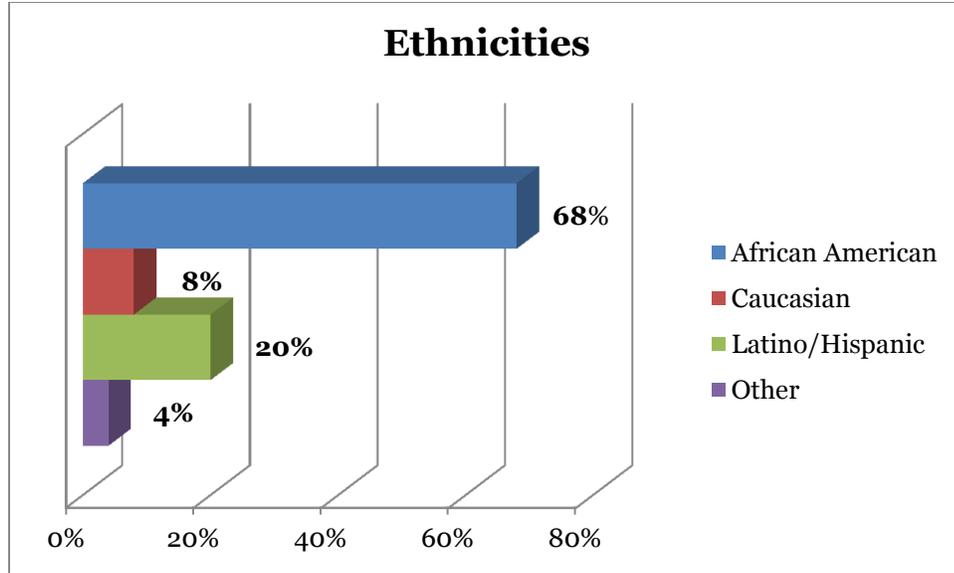

The vast majority of clients (83%) are male.

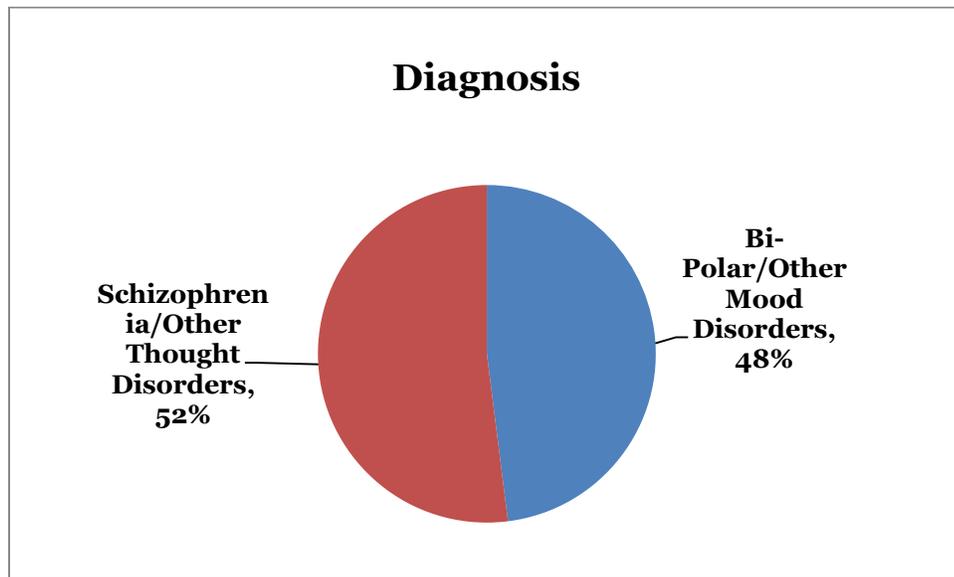

The vast majority of clients (87%) are adults aged 26-59. Six percent (6%) are Transition Aged Youth, and 8% are older adults aged 60+.

Education

% No high school diploma or GED	41%
--	------------

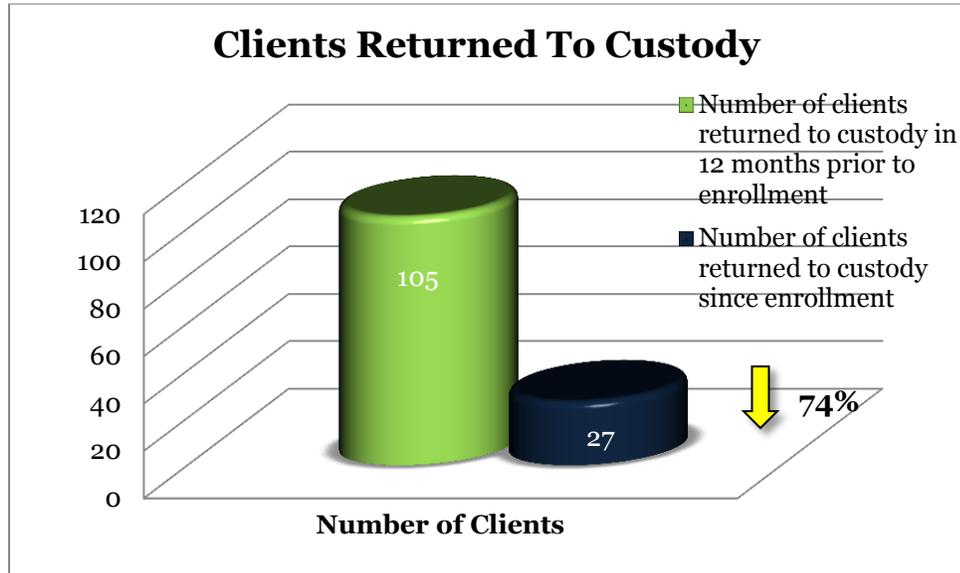

African Americans comprised the largest number/percentage of those served (68%). Eight percent (8%) identify as Caucasian, and 20% identify as Latino/Hispanic. Four percent (4%) identify as Other than the above categories.

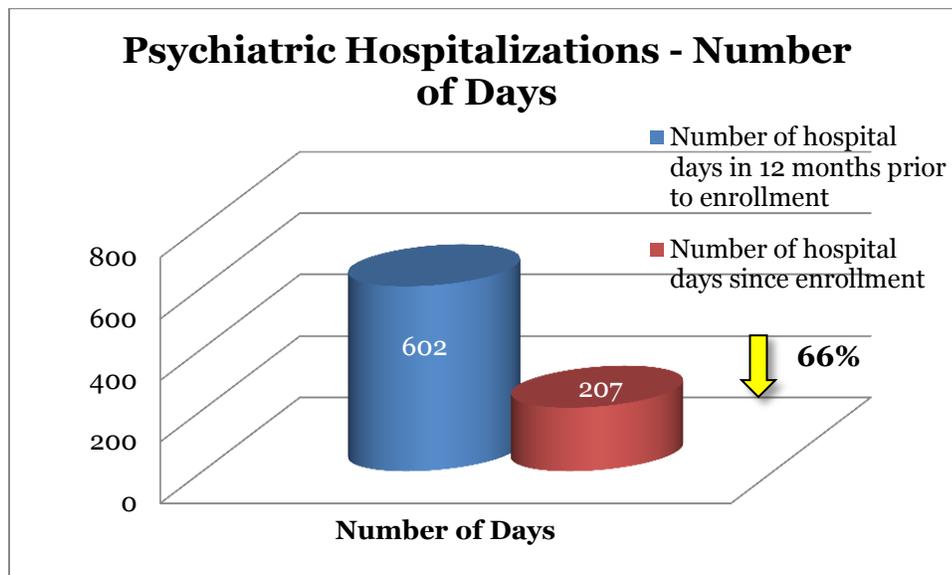

More than half (52%) of clients have a psychiatric diagnosis of schizophrenia or other thought disorder. The remainder of clients (48%) have a diagnosis of Bi-Polar/Other Mood Disorders.

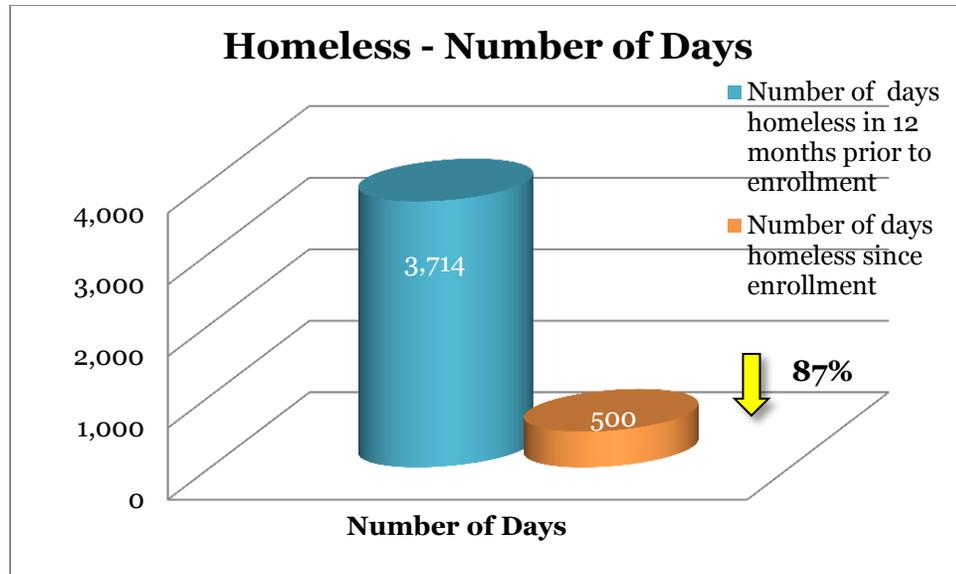

Outcomes

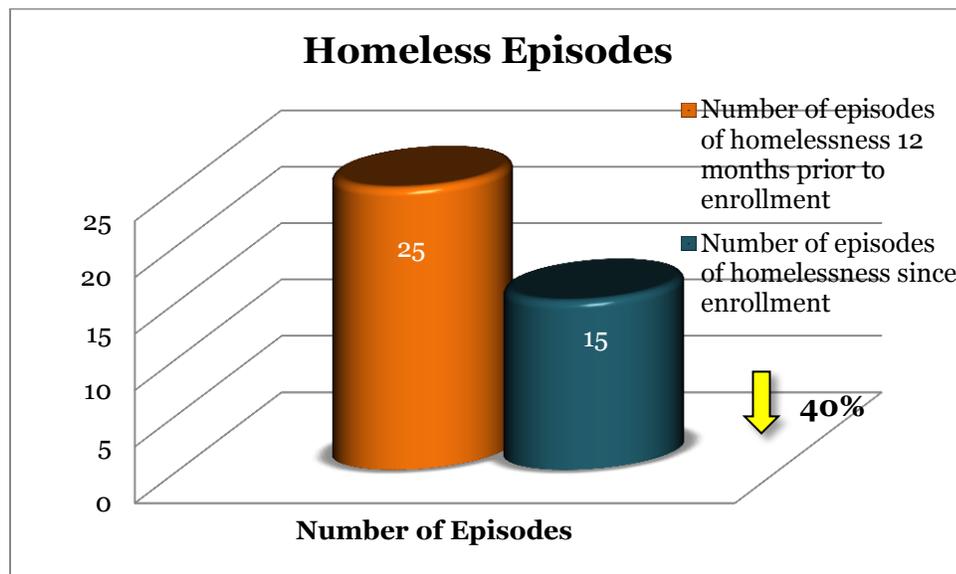

The levels of return to custody have dropped significantly, currently being reduced by 74%. A large reason why is the level of support and therapeutic interventions clients receive.

Days spent hospitalized have dropped by 66%. Our staff is available to monitor "red flags" that indicate worsening psychiatric symptoms and intervene as necessary 24 hours a day, 7 days a week.

The number of homeless days has dropped by 87%. It is important to note that the number of homeless days includes living in a shelter and/temporary housing. If dedicated housing assistance were available, we expect that homeless days would decline even more significantly.

The number of homeless episodes has decreased by 40%. If dedicated housing assistance were available, we expect that homeless episodes would decline even more significantly.
